

Write a poem that features concepts of Freud's "The Uncanny"

In shadows deep, where thoughts do dwell,
A realm of psyche, where mysteries swell.
Freud's "Uncanny" whispers in the night,
A tale of eerie, a curious fright.

A doll that moves with life untold,
Its porcelain eyes, a story to unfold.
Uncanny echoes in the silent stare,
A mirrored reflection, a soul laid bare.

In doubles, echoes, and doppelgängers' gaze,
Freud's concept weaves through winding maze.
A familiar face with a chilling twist,
Unveiling fears that persist and persist.

TEACHING POETRY WITH AI

ENGL 2150: Fantasy & Reality | Unit Focus: Freud's "Uncanny"

In-Class Assignments: (1) Comparing poetry written by Natalie Diaz, a Pulitzer-prize-winning poet, with AI-generated poetry & (2) Students generating poetry via ChatGPT and then analyzing and close reading it

Discussion Questions: What makes poetry, *poetry*? What main elements does AI incorporate in poetry? How does this all relate to Freud's concept of the uncanny and the class themes of fantasy & reality?
